A Successful Woman Farmer in British Columbia

(1) Lillooet country, showing Mrs. Foster's ranch in foreground. (2) Mrs. Foster, of Lillooet, B.C.

At Lillooet, about thirty miles west of the coast and north of Lillooet right in the middle of the dry belt in British Columbia where irrigation is the magic word, Mrs. Foster has turned her desert into a lush green garden.

There is a little 32-acre farm owned by her and her husband.

It catches the eye by its appearance of orderly prosperity, its shady trees, its flowers, its fruit, its clean sleekness of the milk-cows grazing in the higher paddocks and the vivid colors of the flowers and vegetables in strong relief against the vast brown barren slopes of the surrounding sage-brush and little else.

The farmer is a fine first class gardener, both in theory and in practice, and has sweet corn earlier and over a longer period than anyone else in the British Columbia. She devotes about a quarter of an acre of ground to the garden, another piece to the animals, and another piece with a codder aspect to her late summer garden.

Mrs. Foster still carries on - as did twenty years ago. With the help of an Indian who comes in to assist her, she grows all the vegetables, the hay and the hayloft, she and a niece, who sometimes stays with her, manage the whole work of the farm alone.

Mrs. Foster gets most out of her land, and she grows enough to supply the local market.

Her five milk-cows pasture on the

land due to an hotel; besides these there are a dozen or more pigs and many chickens. Every scrap of food used for the stock is produced on the ranch.

Mrs. Foster has worked down to a fine point just exactly how much grain, hay, and other feed is required for alfalfa, grain and hay in order to do this and nothing is bought in the market except the occasional bag of meal for the chickens. The crop and the animals balance each other and there is no waste in either direction.

This farmer is also a first class gardener, both in theory and in practice, and has sweet corn earlier and over a longer period than anyone else in the British Columbia. She devotes about a quarter of an acre of ground to the garden, another piece to the animals, and another piece with a codder aspect to her late summer garden.

The garden contains every sort of tree-fruit, including Italian pears, apples and peaches, and plums.

Mrs. Foster has two big trees (now in bearing) grown from seed sown since she came to the place nine years ago. Last year she ship-

The Home of a Swiss Guide at Edelweiss, B.C.

A very successful attempt at introducing the Swiss-style type of architecture here in Canada by bodies has been carried out at the village of Edelweiss. Miniature chalets of the Alps here blend in with the Canadian timber and stone. The Swiss Golden as though part of it. The "Swiss-ness" of the little cottages is due to the use of rustic bridges and hand railings leading up to the cottages. They are built in the Alpine manner in true "excellent" fashion.

It is a customaries in the very nature of the place that tourists sit by the window of the "Swiss-style" train" to catch a glimpse of this Alpine village.

But, the natural human-interest felt by the Real Swiss guide at Lake Louise, who safely conducts you through the Rockies, the Valley of the Ten Peaks and by other of those enthralling "Trails" to the "Golden Gate of the Clouds" must often have aroused the wonder of these wonderful mountaineers. We were off duty. They have often have had the confidence of the "Guide" so calmly and with such perfect assurance that the name "Swiss" and "Trail-Maker" and "Trail-Master."

This guide is a specialist.

The fact that the knowledge of our own Mountains is so much greater

than that of the Swiss Alps.

No one can claim that Edelweiss is perfect from an architectural viewpoint. That would be absurd. Rather it has the happy little "Swiss" character which makes over 100 buildings.

months and in the electoral district where such person seeks to vote for at least two months immediately preceding the issue of the writ of election

It is provided, however, that any Indian who has served in the naval, military or air forces of Canada in the late war shall be qualified to vote unless such Indian is otherwise qualified in the life and the law of all Farmers

The election date will be known later but it is expected it will be either late in November or early December

The campaign will be short but keen. The premier's announcement of an election before the new year will take to indicate when there will be little delay in cabinet reorganization and in the issue of writs with the holding of the election as soon as the necessary preparations are made

Thousands of women will vote who were not enfranchised in the last election. Then the female relatives of soldiers were entitled to vote. The New Election Law will enfranchise all women with certain exceptions in the case of women of foreign birth, who are over 21 years. Generally speaking, every person, male or female, will be qualified to vote who, not being an Indian ordinarily resident on an Indian reservation:

(a) is a British subject by birth or naturalization; and (b) is of the full age of 21 years; and, (c) has ordinarily resided in Canada for at least 12 months.

The government's relief scheme is

in progress of preparation but has not yet reached a stage where a definite announcement can be made and the ministers are expecting to gather information during their trip that will help them in giving it final shape

Left Thursday 8th. with Hon. Headley to visit the dry Districts

EDMONTON, Sept. 7.—Premier Greenfield and Hon. Gen. Headley leave Thursday night on an inspection tour through the dry belt of Southern Alberta. They will be accompanied, if possible, by Hon. R. G. Reid, minister of municipal affairs, and will make a careful investigation of conditions as found in the districts now calling for some measure of government relief.

Mr. Greenfield points out that it will be, in the case of a considerable part of the area concerned, his first visit, and he is desirous of ascertaining for himself exactly what the situation is, in order that relief measures may be more effectively drawn up. Under escort of the minister of agriculture he will go to the various municipalities in the dry belt and make a careful study of the conditions existing there.

The government's relief scheme is in progress of preparation but has not yet reached a stage where a definite announcement can be made and the ministers are expecting to gather information during their trip that will help them in giving it final shape

England's Traditions

In a young and new country—Canada, and especially, where the population is of mixed extraction, it is not to be expected that a regular polyglot of languages and races, there is apt to develop a feeling at contempt for the stock of past and those traditions of older lands which have been handed down from generation to generation and become woven into and a part of the national character. There is liable to be an impatience with all that savors of precedent and a sense of reliance upon long tried principles and policies which have brought the race to where it is today, enlarged its frontiers and promoted its welfare.

Granted that it would be a mistake for any new country to supinely rely upon and slavishly follow in the footsteps of older lands and their historical past; admitting that only by new departures, by blazing new trails by a courageous initiative, can there be progress—it is none the less true that in the service of their native soil, our people are bound to be influenced in the past, to be inspired, now, by the adoption of revolutionary methods, but through wise evolution, profiting by the mistakes and lessons of the past, but inspired by the glorious traditions and achievements of our forefathers and guided by their ripened experience and wisdom.

It is this that made England the bulwark of the Allies, causing throughout the long drama of the First World War that Germany failed to break through England more than all her enemies combined? And why is it that in these trying first years of peace in a world mired to its very depths it is to England the whole world looks to carry the major portion of the world's burdens and work out the world's salvation?

It is not that the men and women of the English race are so much more cleverly built than others, nor is it that they are, taken as a whole, intellectually superior; it is not that they are lifted above all other peoples. No, it is not because of these things. But it is because there is grounded in the people of England—not merely those now living within the confines of England, but in all parts of the world—the great traditions of England, its history, its literature, its art, its music, its manners, its customs, its ways, its manners, its sports, its pastimes, its past, its present, its future. These are the English's greatest assets. It is such traditions as that established by England's sailors, "Women and children first," and "the captain was the last to leave the sinking ship" that has maintained unshaken England's mercantile prestige and made her naval supremacy no threat to the world. "England never loses when she is beaten," implored the Queen after her famous speech in a speech to Parliament, and the nation remained with the sobering example of Greater England throughout the Great War, even in the darkest days, impelling them to snatch victory from the very jaws of defeat.

Strong, stern, implacable at heart, England is ever stalwart toward a brave but defeated foe. An Englishman admires a good fighter and is the first to admit his good qualities, whether it be on the battlefield or the field of life. England's motto is a symbol for "Gloria Patria." That "Patria" has become a national characteristic.

Down through the centuries England, while reiations of her own rights and privileges, has frankly recognized the rights and privileges of others. Even when an autocratic sovereign has seen fit to do wrong and persecute his subjects, he has always been compelled to yield to reason. This is a tradition of England to be just, and even those who condemn some of her policies in past centuries must, in truth, recognize that in those less enlightened years England was in advance of other countries, plodding toward a brighter, better day.

From these traditions there have grown and developed strong national character and national pride. High-spirited, honest, hardy, and bold, England gives her word, and all reasonable recognition that she will keep it. Belgium relied upon the word of England in 1914, and did not rely in vain. Germany, alone, failed to realize that England's pledges are made to kept and not treated as scraps of paper. Only recently, during the worldwide discussion of the question of the Anglo-Japanese treaty, Lloyd George, the British prime minister, when asked if he had not been faithfully fulfilled her obligations during the Great War and made possible England's great effort in France without the handicap of guarding the Pacific, he asked: "Shall England, having accepted this assistance when it was so urgently needed, turn round and refuse to maintain the mutual obligation when that England does not require it?" Englishmen emphatically answered "No."

England's traditions are the source of England's strength and England's greatness. They are the warp and woof of the national character. Woven out in these days of world upheaval England and the British Empire might easily be rent asunder and go down in the oblivion of other great empires of the past. No country can truly call itself a nation until it has traditions of its own. England, however, in her traditions, in her past, in the Great War, in her at least conferred this benefit on Canada that it has given us our one great tradition, one that will live forever and will leave an indelible impression on all future generations of Canadians.

Accredited Herds

Sixty Thousand Dollars a Month Has Been Spent in This Work.

Since September, 1919, the "accredited herd" plan has been partly operated in the Dominion of Canada. The original breeding herds in the United States who had recognized for a long time the serious inroads water tuberculosis had been making in their herds and by 1917 the Federal Government had taken similar actions. They are in Canada at present about 17,000 accredited herds, that is, herds which have undergone three semi-annual tuberculin tests and have been proved disease free. Their distribution among the provinces is: British Columbia has 7, Ontario, Manitoba and Saskatchewan 2 each, and Quebec has 4. For the last three months an experiment has been carried on in Newfoundland. Much has been made on this head, but it is understood that owing to the general financial stringency, the work cannot be continued at this rate.

The Spaniards consider Tuesday an unlucky day for marriage.

Rye In Drought Areas

Expected There Will Be One Million Acres Sown in Rye This Year.

M. A. Brown, of the Western Canada Colonization Association, who has returned from a tour of Southern Alberta and the West, while he took part in the conference for the release of fall rye acreage in the drought areas, stated that it is expected there will be one million acres sown in rye this year. Four per cent of the land in the prairie provinces still need a portion of their land to this crop. Results of farmers who have tried rye are all in favor of the crop for the drought areas, he said.

Fish In Abundance.

Abundance of fish is reported from all points on the southern portion of the Labrador coast and numerous schooners are returning to Newfoundland. The fishery is excellent. It is also anticipated that the bank fishery on the west coast of Newfoundland will be the best for many years.

By making your purchases from your home merchant you are contributing direct to the prosperity of the community in which you live.

The Spaniards consider Tuesday an unlucky day for marriage.

Fighting Grasshoppers

Tremendous Amount of Material Used in Waging War Against Plague.

The fight against the grasshoppers for 1921 has been finished in Saskatchewan, a large area is in sight for next year, according to officials of the department of agriculture. The total amount of materials mixed into poison that is being sprayed over the land is 1,400 tons of lime, 100 carloads of sandstone, 361,233 pounds of arsenic; 10,100 pounds of paris green; 92,360 gallons of molasses; 895 barrels of salt.

You May Have Kidney Trouble and Not Know It

If your back aches and you suffer from dragging pains, it is evident your kidneys may not be acting just as well as they should. Consult with Dr. Hamilton's Pills. They contain both Mandrake and Butcher Root, which are well known for kidney and liver and kidneys. "I was bothered with a great deal with my kidneys, but got along with Dr. Hamilton's Pills. My trouble manifested itself by pain in the back and by constant headache. I took Dr. Hamilton's Pills and a few hours of Dr. Hamilton's Pills. They brought me health, strength and energy again."

The Catarhozine Co., Montreal.

New Gallipoli Incident

An Interesting Bit of War History Concerning the Evacuation.

Lord Northcliffe recently revealed an interesting bit of war history concerning the evacuation of Gallipoli. The hero of the story was Keith Murdoch, an Australian journalist, who is returning home to become editor of the Melbourne Herald, and the occasion of the telling of it was the luncheon given to Murdoch by the Times.

"It is an open secret," said Lord Northcliffe in proposing Mr. Murdoch's hero. "The Times was then the most popular newspaper in Australia and the rest were removed from Gallipoli. Coming to England for the first time, went to Gallipoli peninsula and for the first time the news was received that the British had been evacuated. He was brought along despite a very terrible despatch which I believe was intended to be sent to Australia. He showed that despatch to me and I suggested that the time would be spent carrying it to the Foreign Office. To do this he could, he bettered up for the purpose of immediate action.

"I asked him to take it to Lloyd George and on the first phone call to the Prime Minister did in the war, was circulate the document to the whole cabinet, which then constituted twenty persons. As a result of Keith Murdoch's despatch, half a quarter of an hour later, he was summoned to the Foreign Office for the purpose of immediate action.

Belfast Is Now The Storm Centre In Irish Political War

Belfast—Although the truce between the dissident factions is being faithfully observed throughout the remainder of Ireland, Belfast is experiencing a period of terror from gunners and snipers.

The Ulster cabinet met to consider the severe condition prevailing here. Military officers, police and others joined in the discussions. Arrangements were made to draft additional troops for the protection of the city, and other steps were taken to re-establish order.

London—the grave disturbances in Belfast which have come in the midst of the most delicate possible peace negotiations with Ireland were occupying the attention of the entire nation. The correspondents of London newspapers say that they designate the present trouble as purely religious and it is certain that this element enters into the conflict to a more or less degree as always has been the case in Ulster politics. King George has issued a royal warrant for the convocation of Canterbury, says:

"Let us thank God that some measure of response has been forthcoming to our appeal to the Irish people. With full heart we trust that their civilization may be compensated by the deliberations now proceeding and that they may be united in making a new era for their native land."

Must Hold Their Grain

Mennonites Ordered to Await Outcome of Inspection Proceedings.

Regina, Saskatchewan—Mennonite communities in Saskatchewan, whose lands are involved in litigation as the result of the grain deal for the purchase of the Manitoba grain holdings by an American syndicate, will be unable to dispose of their 1921 crop until the pending laws have been determined. This is the result of an application before Mr. Justice Mackay in the Regina Court Room, presided over by Justice Thompson, for an injunction restraining the Mennonites or anyone else from selling crops now being harvested. The application was granted.

It is estimated that a million bushels of grain will be held up as a result of the order.

For Cheaper Coal

Discuss Plan to Operate Briquette Plant at Belfast.

Ottawa—Proposed plans for the opening and operation of the Government briquette plant at Belfast, Sask., are expected to be completed during the visit to Ottawa of Premier Martin and Hon. C. Dumpling, of Saskatchewan.

The plant was built at a cost of \$60,000 for the purpose of manufacturing the low grade lignite coals of Southern Manitoba and Saskatchewan into briquettes for household use. Work on the plant will commence as soon as operating plans are arranged between the governments.

Panama Traffic.

Washington—During the seven years of commercial operation of the Panama Canal beginning August 14, 1914, a total of 1,146,000 vessels passed the transit through the Isthmus, according to the records. The aggregate tonnage of these vessels were 46,889,942 and their cargo totalled \$1,578,920 tons, or 2,240 pounds.

International Court Of Justice Promises Well

Speculation Ripe as to Probable Choice of the Council and Assembly.

Grenada—By a resolution adopted by the council of the League of Nations, that body will assume control of stipulations in the treaties with Hungary and Rumelia regarding the rights of minorities in the territories which changed their sovereignty.

Chief interest in the work of the council comes for the moment with the international section of which, it is regarded as promising better results than any other section of the league thus far. Speculation has begun as to the probable choice by the council and assembly of the members from among those who have submitted names for that purpose.

Canada has submitted the names of Sir Robert Borden and Rt. Hon. C. J. Doherty, minister of justice, for consideration by the league.

Wireless For North Country

Plan Commercial Wireless Between Edmonton and Fort Norman.

Edmonton, Alta.—Edmonton and all the outside world is soon to have direct wireless communication with Fort Norman, the capital of the Northwest Territories, as well as other northern posts according to the plans of a local firm, who have just been granted a federal license for the operation of commercial wireless between these points.

Local men are interested in what is being done by other local men who are interested in the project.

Mr. L. Perry, who is promoting the scheme, for his firm, says that work will be started on the lines of the Edmonton system which will be located outside the city limits, away from the city power plants and other sources of electrical energy.

Marconi equipment will be used, and wireless operators will be expected to have the system in full operation by the early spring.

With the installation of wireless upon the northern steamers, a complete system of wireless will be available through the north.

Proposed Wheat Pool

Will Consider Action Regarding Proposed at Meeting in Winnipeg.

Vancouver, B.C.—The Canadian Council of Agriculture will hold its annual meeting at Vancouver on October 15.

The special committee on wheat marketing will meet two days prior to the opening of the general meeting to consider what action is to be taken on the proposed to pool the wheat crop. The question of carrying out with the plans now made or cancellation of all plans will be discussed, and a report made to the general meeting.

The status of the Canada Grains Act will also be under consideration, it was stated.

Takes Offer Car Line.

Ottawa—After sixty years of private control of the Canadian Pacific Railway Company, the rail car system came back into the city's possession at midnight, Aug. 31st, the franchise having expired. It will in future be under the management of the recently appointed commissioners of the crown.

Reward Still Open.

Toronto—A reward of \$50,000 cash for the whereabouts of Ambrose J. Small, missing Toronto theatre owner, alive, or \$15,000 for his dead body, will be continued, according to a local afternoon newspaper.

Sign Gunboat Treaty.

Bogotá—The South American powers, including the United States and Hungary, were signed recently by Foreign Minister Banffy and Ernest Smith, United States commissioner here.

Sets in Cape Town.

London—A Router's cable from Cape Town, South Africa, reports the arrival there of General Smuts, prime minister of the South Africa Union, who received an enthusiastic reception.

Bonfleur Dead.

Berlin—Field Marshal General Von Bonfleur, who was commander-in-chief of the German second army during the war, died here.

Consider Freight Rates Reduction

Ottawa—Reductions in freight rates were under consideration at a private conference between the Board of Railway Commissioners and representatives of the Canadian Pacific, the Grand Trunk and the Canadian National Railways. Hon. F. B. Carvell, chairman of the Board of Railway Commissioners, has expressed the view that something must be done to meet the present situation and is hopeful that some immediate action will be taken as a result of the conference. In support of a reduction in freight rates, the view is taken that falling wages and cheaper materials have reduced operating costs.

Turk Losses Heavy

Making Counter-Attack to Arrest Advance of Greeks.

Athens—Reports that Greek troops engaged in the offensive against the Turkish Nationalists in Asia Minor have suffered a reverse are denied in official statements. It is asserted that it is declared however, that the battle along the Sakarya River is continuing with violence.

Towns along the southern coast of the Black Sea have been bombarded by Greek warships, the statement says.

Newspaper despatches from the front state the Turkish Nationalists are making continuous counter-attacks, arresting the advance of the Greeks. The Turks are reported to reserves to the front to take the place of troops killed or wounded in the fighting, it being said that the Turkish losses are heavy.

Getting After Drug Smugglers

Seaplanes Found to Be Invaluable in Catching Offenders.

Ottawa—Air patrols have been instrumental in frustrating to a large extent the efforts of drug smugglers to land their quantities of drugs illegally on the Pacific Coast, according to reports reaching Air Board officials from the customs department at Vancouver, where seaplanes have been used to intercept the efforts of the customs officials in their fight against the dope smugglers.

In a recent patrol, a drug smuggler was arrested while trying to smuggle a package of \$10,000 worth of opium from one of the vessels travelling between Canada and the Orient. The circumstances of the drug smugglers is a game which keeps the customs officials on the watch as new landing places are tried almost for every ship and it has been found that the seaplane is the only method of transportation speedy enough to enable the customs department to meet the situation.

Want Membership of Five Million.

Atlantic City, N.J.—A campaign of the American Federation of Labor for a membership of five million will be launched this fall, according to the president of the organization's executive committee.

The campaign has been ordered by the council because of the recent slump in membership of the federation due to unemployment. The present membership is said to be 3,906,230, as compared with 4,078,740 in 1920.

Makes Plea For Unemployed.

Toronto—A plea for work for unemployed men, which has been made by the Royal Society of Victoria, Governor-General of Canada, when he addressed the Canadian Club at a luncheon tendered in his honor. The event brought together many of the important figures in the army, ecclesiastic, social and business life of Eastern Canada.

Italian Ship In Serious Condition.

Naples—The situation arising from the retention of the steamship Pocahontas by the Italian authorities in death cause of failure to pay her passage, has become serious because the ship has aboard only five day's rations for its 28 passengers and 253 members of the crew.

Fires Destroys B.C. Plant.

Nanaimo, B.C.—Fire completely destroyed the plant of the Nanaimo Fish, Meal and Oil Refining Company causing a loss estimated at nearly \$50,000 on which there was \$20,000 insurance.

Royal Chaplain Dies.

London, Eng.—Captain George Stephenson, chaplain at Windsor Castle for many years is dead, aged 76.

He was chaplain to Queen Victoria, later to King Edward, the Queen Alexandra, and to the present Royal family.

WESTERN EDITORS

Steamboating On Saskatchewan River In The Late Seventies

By O-G-E-MAS-ES (Little Clerk).

(Copyright)

He was to go in his cabin and remain there, hand the boat over to me, with authority. Falling him down, this, I would return and report. He at once marched me round to the masts and told me to give orders to this effect and disappeared. I went ashore very leisurely and waited myself shaking hands with the mcontents. I told them the latest news and generally had a good gossip. Finally, he came up, I was dry-grogged, and I went a hunting."

"Steward," at the top of my voice. Then to him I said: "You see my friends here, we are hungry, get your waiters busy and serve us a first-class meal." He said, "I am sorry, we have no cook." I said, "I am sorry, we have no cook." He said, "I am sorry, we have no cook." I said, "I am sorry, we have no cook." He said, "I am sorry, we have no cook."

It was done at once and a merry scene followed. Jokes were made against the Big-Knives (Yankees), and broad

witticisms of all kinds flew about. One Indian, a tall, thin young fellow called Shka-me-ka (Mafra) was the strongest man on board. He evidently a ringleader in the strike. We had all lit our pipes, when I issued a challenge to Shka-me-ka. We had to decide the matter by a race for first oars, and I let him have a sack of flour to one that my gang could entice him in a given space of time. The challenge was accepted, and though night had come, it made no difference, they were many flares. Never was freight handled so quickly and the load was hoisted in quicker time.

As all the dialogue has been carried on in Cree it was quite a mystery to the Indians, but I had a talk with the chief, and he said, "I am sorry, we have no cook." I passed the hook to the chief and told him to start at once. I then visited the man in the cabin and advised him to keep out of the way as much as possible, so the men would not turn him out. I went to the Rapsis at a much more leisurely gait than when we came up.

Poor old Captain W., an old steamer captain man, but with trouble of mind, he had a bad attack of rheumatism and his memory was not very

writable. The Northerner made the Forks of the Saskatchewan all right, but there was not water enough to haul him up, so the men had to wade up across the falls, so the freight was unloaded there and hauled up to Prince Albert, a distance of about a mile.

A Runaway Car at Grand Rapids, Portage

Three and a half miles of steel rails crossed the Portage River, holding a strip of land which was about half a mile wide at midways, and a short grade from both ways. Small flat cars carrying from three to four tons were used, and mules were used to pull the train. And every effort that could be made to carry the mules was made to get the mules to stick to the track. Dr. Tolmie said that the banks of the river were high and the mules were used to stick to the track.

It is understood that there is no specific limit placed on the total amount which the banks may advance under the arrangement with the government.

Printers Resort to Prayer.

Taranto—Printers of 90, International Typographical Union, who have been on strike nearly three months for the last week, offered to end their strike if the Pope would intercede for them, according to the Toronto Globe, which adds: "It was the first time a trade union turned to prayer in its fight with employers, and it is doubtful if such a scene was ever witnessed in the labor temple before."

Spanish Aviators Exploring Morocco.

Madrid—Spanish aviators, operating with the forces opposing rebel Moors, are conducting extensive explorations in the mountainous districts in Northeastern Morocco, which are given an official statement issued here. Hostilities between the Spanish and Moors appear to have died down as the winter declared nothing new had occurred.

Paying Insurance For Auto Fatalities.

New York—An estimate of \$4,500,000 was paid by life insurance companies of the nation in death claims from automobile fatalities in 1920, published by the Insurance Press.

The figures are quoted to show that during the year 12,000 fatalities caused 12,000 fatalities and a million other injuries.

Demand Race Equality.

London—Absolute race equality, political and social, as a foundation for advancement is the claim set forth in a manifesto to be worded by the African Congress now in session in South Africa. Various peoples of African descent in the United States, West Indies, Central and South America and Africa are represented.

The congress will meet again in Brussels, Belgium in September.

There are 12,000,000 negroes in the United States.

W. N. U. 1384

War Officially Ended August 31

Order-in-Council Was Approved By King George.

London—The King held a Privy Council at Buckingham Palace for the consideration of many matters of business, affecting various Government departments.

His Majesty approved an Order-in-Council with respect to the date at which the war would be officially terminated. This order provided for the official termination of the war at midnight on August 31, and to be of general application except in regard to the Ottoman Empire.

This matter, although formal, is of very great importance. Having up to this time been in a state of semi-war, the British and French governments had been compelled to make a number of national interests dependent upon the date at which the war is declared to be at an end.

Population of Scotland Increases.

London—The preliminary report of the Scottish census just issued shows that the population of Scotland has increased considerably since the last census was taken in 1911. The population is given as 4,900,000, including 2,300,000 males and 2,534,000 females.

The great total representing an increase of 121,000 over 1911.

Patronize your local merchant and help to build up your home town and community.

Conference Interests China

China's Participation in Conference Disputed.

Washingon—Interest in China's participation in the conference on disarmament and Far Eastern questions to be held in Washington, is shown in the formation of a number of associations pledged to support this country's cause at the conference.

A large number of prominent Chinese have been enlisted in these organizations, and the Chinese delegation to the conference, headed by President Harding's invitation to send a delegation to the United States capital.

The Constitutional party of Chinkiang Province has issued a call to other provinces to send representatives to Shanghai for a discussion of the Washington conference.

Want Exchange on Official Basis.

London—The British Board of Education is advocating that the exchange of teachers between the universities of the Empire should be established on regular official basis.

Hilberto New Zealand is the only Dominion whose Government has given the project direct official support.

Compliment Lloyd George.

Edinburgh—Before leaving Edinburgh for Blair Atholl, Premier Lloyd George was complimented by a reporter on the fine example he had given the citizens when attending church twice on Sunday.

**Hold Off Sowing
Rye Until Sept.
Advice Given**

"I would advise farmers not to sow rye until September 10th, on account of the grasshopper menace," said M.L. Freng, agricultural agent for Southern Alberta, this morning. "I would hold off as long as possible, and I would set out poison before sowing," he cautioned further.

J.C. Hooper, principal of the Clarence School of Agriculture, expressed the same opinion. He told of the experience they had on the demonstration farm there. Fall rye which looked perfectly ideal a week ago was cut down to the ground. In reply to a question as to whether this was due to the grasshoppers, Mr. Hooper replied that it might to some extent, but he had very little hope. "A tender plant eaten down to the ground has very little chance of life," he said.

Mr. Freng explained another method that is being tried. A rod of bare ground is left around the average sown to rye. Poison is sprinkled on this land. It is thought that the hoppers might attempt to cross the bare spot and finding nothing would either turn back or eat the poison. This is merely a suggestion but it might be worth trying. The government officials cannot recommend it as it has not been given a thorough test.

**Grasshoppers as
A Real Menace
Must be faced**

The seriousness of the grasshopper situation was emphasized by E.H. Strickland, government entomologist, who stated that unless drastic measures of destruction were taken the hoppers would increase from year to year for perhaps another three or four years when they would begin to disappear. We might just as well take a stand on this matter. The hoppers are going to be far worse next year than they are this. We have had them here three years now and they may be here for three or four more years. They operate in cycles but the cycles are long ones. A systematic campaign must be waged if the country is to be saved," said Mr. Strickland.

Continuing, he stated that they were spreading north and east. They have now reached the Saskatchewan boundary and have crossed the Red Deer River.

With regards to grasshoppers damaging fall rye, Mr. Strickland urged that the most effective precautionary measure late sowing, September 16th was mentioned as a possible limit, and farmers are advised to seed as close to that date as possible. The setting out of bait is of course in order also.

In an article on Grasshoppers, Mr.

Strickland says that they are almost sure to be here from two or three years more and the Farmers must co-operate if they expect to keep them down. He also says not to seed Rye until September 16th, as by that date the hoppers will in some measure have disappeared.

But unless our new government passes some laws at the next session of the legislature, compelling every land owner to poison hoppers at the most effective time, there will be no use of putting in any crop. A law which will also be needed is one compelling owners of vacant land to put out poison the same as resident owners.

It is very generous of our government to furnish free rye seed, but why not furnish the poison bait with it, as they do in Manitoba? Poison seems to be the only remedy, but there are only a few farmers in this district who feel like to buy poison to do this work. Messrs. Strickland and Seaman are doing a great deal of work and have demonstrated in this vicinity what poison bait will do, but they are handicapped by the fact that farmers

have been dried out for four years have very little money and less enthusiasm to wage a war on Grasshoppers.

Almost half of the standing grain which escaped the hail storm was destroyed by the hopper cutting off the heads after they had saved the leaves. What can we look for next year if they come in the same proportion as they came this year? We must all get interested in the hopper fight if we wish to raise any crop whatever next year.

**Solution of South
Alberta's Problems
one of First Things
Urges Premier
Greenfield**

While the most thorough investigation and the most careful consideration will be given by the provincial government to the proposed project, Premier Greenfield told a big delegation of boosters for the Jasper highway to the coast, who met the Alberta Cabinet, Monday, that no promise could be given as to how far the government would eventually go in the matter of providing funds.

In answer to the delegation, the premier pointed out that the new government is confronted with many serious problems at the present time, particularly with regard to the situation in the south, "and I want to say that I sympathize with the southern settlers in their troubles and one of first things this government must do is to try to find some solution for that problem," he said.

**Pres. Beatty to
Tour the West**

MONTREAL Que. Sept. 6.—On the first official trip of the directors of the Canadian Pacific Railway Co. since the new Alberta became headed by a provincial cabinet, Monday evening, at 8.30 P.M. the train stopped at Medicine Hat, and is expected to pass through Bow Island on Tuesday 7th.

Mr. Beatty is accompanied by his director and Vice President A. D. MacFie. They will be joined at Fort William by Vice Pres. D.C. Coleman, and at Winnipeg, by Sir Augustus Norton, director and his brother Gen. Norton.

IN THE SUPREME COURT OF ALBERTA JUDICIAL DISTRICT OF LETHBRIDGE

BETWEEN NO. 4265
THE CANADIAN MORTGAGE INVESTMENT COMPANY

Plaintiff
and
ROBERT F. MITFORD
Defendant

There will be offered for sale by public auction subject to the approbation of a judge at the Court House in the City of Lethbridge on Friday the 30th day of September, 1921, at the hour of 3 o'clock in the afternoon the following property namely: the North East quarter of Section 33, Meridian in the Province of Alberta, containing 160 acres or more less, reserving all mines and minerals and the right to work the same.

The vendor is informed that there are on the said lands the following improvements:

House 20' x 29' and extension 12' x 16'
3 Garages

Chicken House

Barn

Well and windmill tower

The vendor is also informed that 100 acres have been under cultivation

The said property will be offered for sale subject to a sealed reserve bid, free from all encumbrances save taxes for the current year and save certain seed and feed items registered against the said lands.

Terms of sale 20% cash at the time of sale and the balance in six monthly payments at the rate of 10% per annum.

WINNIFRED

Threshing is now in progress on F. Lyons, W. Teulner, N. Hansen, M.J. Collins and H. Davis this week and reports bring out a good yield, these farmers believe in less acres and good work is the method they follow

Misses T. Long E. Parker, I. Birch and M. Smith left last week to attend High School in Medicine Hat

Miss Catherine McDonald of Medicine Hat is spending a few weeks holidaying on their farm

Mr. and Mrs. Roy Colthorpe are in Medicine Hat this week where they went to receive medical help, their baby being very sick

Mr. Alex Smith returned to Hanna, Alta. after a short visit with his family

Many farmers expect to put in a large acreage of Rye next month

Mr. Wm. Moore, Massey Harris Inspector was in Winnifred Saturday 3rd.

Winnifred Bell Cross Branch held a meeting Sept. 3rd.

Mrs. W. H. Scott and Mrs. Jas. Castle motored to Medicine Hat last Friday

Mr. Wm. Craig and E. Doherty were business callers in Medicine Hat this week

Mrs. Teddy Winchcombe left Sunday by motor car for a visit at Eriksen with her parents Mr. and Mrs. John Schell

Miss Sylvia Daniels left on Tuesday for Medicine Hat, where she will attend High School

Mrs. Della of Winnifred was a visitor to Bow Island on Monday last

Mr. and Mrs. Robert Fairhurst are in Bow Island from Vancouver to look after their crop interests

Miss Doris Ross will make her home with Mrs. Alex Smith this year to attend Winnifred School

Mr. J. Cansey Government Rye Seed Agent was in Winnifred Monday 5th.

Local Market Quotations this week
Batter 25¢. Eggs 25¢.

BOW ISLAND**FLOUR SACK BAZAAR**

The Women's Institute has decided to have a Flour Sack Bazaar and donations from anyone interested would be much appreciated. A prize will be given for the most original and useful article made from flour sacks only, articles to be handed in by next meeting, Sept. 17th.

The Ladies of the Altar Society will meet on Thursday the 13th of Sept., in St. Michael's Hall.

The Ladies met last Thursday the 1st. Sept., at the home of Mrs. Alberta Goodey and a very good meeting was held considering how many were there boys to mow their lawns.

The funeral will take place tomorrow Saturday at 2 p.m. from the Anglican Church here.

Mr. and Mrs. Roach, Senior, from Nova Scotia are visiting here with their son and daughter-in-law Mr. and Mrs. R.H. Roach.

Baden Evans left for Moose Jaw on Monday and will go down east for a visit to his relations.

REYNAR-STANLEY

A nice wedding took place at Wesley Parsonage at Lethbridge on Saturday, Sept. 2d. when Rev. W.E. MacNiven united in marriage Mr. Thomas Alford Reynar of Maled and Violet Isabel Stanley of Bow Island, but late of Plimpton, Devonshire, England.

Mr. and Mrs. Reynar will make their home in Maled.

Father Greene took the services at St. Michael's Church on Sunday last in father McCay's absence.

Father Green left for Banff on Sunday night, where he will take charge of the Parish duties for some time.

Mrs. Frank Brophy had her crop threshed out by Dick Kirsch on Tuesday last. Mrs. Brophy will be leaving for the coast either Tuesday or Wednesday.

Mr. and Mrs. Robert Fairhurst are in Bow Island from Vancouver to look after their crop interests

Miss Sylvia Daniels left on Tuesday for Medicine Hat, where she will attend High School

Mrs. Della of Winnifred was a visitor to Bow Island on Monday last

At the opening of the Winnifred School for the fall term Sept. 6th, there was a small attendance. Miss D. C. Maloney will have charge and teach all grades again this term, all look forward to another successful year.

Mrs. Doris Ross will make her home with Mrs. Alex Smith this year to attend Winnifred School

Mr. J. Cansey Government Rye Seed Agent was in Winnifred Monday 5th.

The Spirit Of The British Nation That Overcomes All Obstacles

The following gives a few extracts from an article written from London by W. C. Barron, and published in "Illustrated New York," under date of the 11th July, entitled "European Settlements".

Two years ago I declared that England was the great war sufferer, but that her spirit had not been broken; though I saw pretty clearly that the demoralization in her coal mining forces and her future shipping profits and her transportation misfortunes would do to her national income. Now England looks to the situation, but not fully so.

The sentiment of the people may be expressed thus as I quote from one returned from the occupations area in Germany: "We have won the war, and the first thing to hold out is how much Germany can afford to pay. If she can pay and won't, we'll make her. We will drive right into Berlin with the French and help end the war, and hold industries until what she has got to do. But if she cannot pay, well, buckle down to it and pay up ourselves as best we can. We have no intention of repudiating any of our obligations, but we are going to the United States. We are going to see everything paid."

Few people are in position to take the financial latitude and longitude of this little Isle.

The government people but hope this springing that the deficit would not exceed £100,000,000. Present prospects are that it will far exceed that for this fiscal year. It should be remembered, however, that every war is a period of great expense, and that war carns and that war expenses cannot be checked immediately after the close of the war.

This is not so serious a matter when only one or three years are involved. Other nations have the resources and goods and can extend credits. The serious problem before the world today is to find the credit in the after-war reconstruction period.

But the English people realize ways to recognize defeat, and they have always confidence in their national leadership, and in their "muddling through."

If one leader or set of leaders fall, they know that others must come forward.

As a nation, the English people today stand confident and defiant.

They won; they are English; and they are strong.

Their trust is in their race, their blood, their bulwarks of empire, and above all, they have a supreme faith in an ever-abiding and ever-renewing Providence. They trust by themselves, their neighbors and their allies, during the war. They will even see justice done to the living and honest working people of Germany. They will continue to do their duty day by day.

They have defied the lightning of war, and they will face the lightnings of finance as they have to. They will borrow and they will pay; but they will not, in advance, borrow any trouble.

Match Making In Nelson

Soft White Pine of the Kootenays Found Suitable For Purpose.

Very apparently, the soft white pine of the Kootenays has recommended itself to the match-making industry as suitable material for matches. Following the recent announcements of steps to be taken to make matches at Nelson, a second industry similar to but entirely independent of the first, has been launched at the inland city. This is a plant for making out "match boxes" and "match sticks" when various match factories will buy the material for turning out matches. It is said that by August 31 this second plant will be in operation at Nelson, giving employment to from 100 to 150 persons.

W. Powell, founder of Spokes, is the principal in the new industry, and he estimates that he will be shipping about a car a day of the product to the eastern market.

Just as the chin gives qualities to the face, so the thumb marks the personality of the hand, and is an unerring index of a man's natural strength or weakness of character.

Spend your money at home, there, by helping your own town and local merchants.

In the east, as a general rule, Turks wear yellow slippers, Armenians red, and Jews blue.

W. N. U. 1384

Facts About Old London

Most Wonderful City Covers Area of 673 Miles.

Remarkable facts and figures revealing the immensity of London and the ramifications of its administration—"Municipal Year Book" for 1921-22. There are really several Londons—all of them equally wonderful.

There is London, the administrative center (112 square miles) whose population was 4,532,960.

Then there is the Greater London of the police force. This goes as far as Epsom. It contains 520 square miles with a population of 7,252,963.

There is also a London which extends over an area of 538 square miles, a constituency represented by 105 members of Parliament.

London is London, the metropolis, with a population of 14,447 or thereabouts but when the City is awake its noon-day inhabitants total 360,000 plus a million entering within the boundaries every day.

The Apple In Canada

Efforts To Secure New Varieties Adapted To Varying Climatic Conditions.

Apples being of prime importance to Canada, not alone owing to the wholesome domestic consumption but also because of the large foreign special attention is paid to their culture at the experimental farms and fruit stations. At the central farm in Ottawa there is a large test orchard where varieties are compared.

Carefully weighed information has been disseminated throughout the country as a result of these experiments. From time to time during the thirty-three years since the orchard was established, winters have occurred in which varieties were subject to very severe weather conditions. The latest was in the winter of 1917-1918, when many trees were killed and the orchard was reduced to 1919, when trees died that had been previously weakened.

In the ten or more years these tests have not been confined to the farm but have been aided and confirmed by experiences at other farms and stations in different parts of the province.

But the English people realize ways to recognize defeat, and they have always confidence in their national leadership, and in their "muddling through."

If one leader or set of leaders fall, they know that others must come forward.

As a nation, the English people today stand confident and defiant.

They won; they are English; and they are strong.

Their trust is in their race, their blood, their bulwarks of empire, and above all, they have a supreme faith in an ever-abiding and ever-renewing Providence.

They trust by themselves, their neighbors and their allies, during the war. They will even see justice done to the living and honest working people of Germany. They will continue to do their duty day by day.

They have defied the lightning of war, and they will face the lightnings of finance as they have to. They will borrow and they will pay; but they will not, in advance, borrow any trouble.

African Spider Is a Paper Maker.

The original papermaker is the paper spider of Africa. It has manifested its skill in building its home in fine paper of its own making, when it selects a smooth surface, about two inches square, covering it with fine threads that are paper, plating it with egg shells, and then covering it with a thick coat that pastes it down tight until the eggs hatch in three weeks.

African Bacon Extracts.

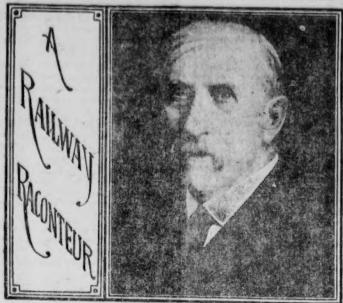

The value of bacon exports from Canada during 1920 was \$34,000,000. An active campaign is being conducted by the Federal Department of Agriculture in co-operation with the provinces to maintain the quality of Canadian bacon, which years ago procured for it a steady market in Britain.

"Now, friends and comrades," said the street corner politician, after a big speech made in the pouring rain, "any questions?"

"Yes, pipe smokers remanded his difficulties, as usual. "Can I get the bus you're standing on to make a go-cart with?"—The Evening News (London).

It was a Roman custom to hang heads of red coral on the cradles of infants and round their necks to preserve and fatten their teeth."

Give your local merchants a chance to buy at home.

George H. Ham

The birthdays of Mr. George H. Ham, of the C.P.R., have for many years past been observed by some function or other. If it was not a home-made dinner with a score or so of close friends, or a public banquet given by the railwaymen, or a dinner in a hospital, or a trip on a railway train, it was something else. This year a radical departure is being made from the ordinary August 23rd celebration with the annual book company to Toronto as the sponsor of the innovation. On that day, this publishing company issued "Reminiscences of a 'Raconteur,'" the author of which is Mr. Ham. It is indeed a Maclean's Magazine, the author recalls incidents of his busy and by no means monotonous life from the infant age of three down to the present day. In "When Toronto was Young," he gives a graphic description of the Queen City in days gone by. In politics and politics and politicians give the reader an hillock unknown insight into the life of many of the grand old men of Canada, when Sir John Macdonald, Sir Wilfrid Laurier, Sir Richard Cartwright and others held sway.

The "C.P.R." of which Mr. Ham has been part for nearly a third of a century, is presented in a way that only could be done by one who has been a part of the railway family. From his early boyhood days, he recounts events which include the Fenian Raids and the second Red Rebellion, of chasing the rebels by what was then called the railway early days of Winnipeg and the West, of the Governors-General who has met, of the intrepid officers of the Hudson's Bay Company, of which he was a member, mingled with the Canadian soldiers who accompanied him to the Canadian Army's Press Club of which he is the only native member, and he writes entertainingly of banquets and acquaintances who are to be found in the four quarters of the globe.

The Dover Patrol

Gallant Company Kept the Postern Gate Day and Night.

The Prince of Wales visited the Dover Patrol Memorial at Leadenhall Street's Point, four miles east of Dover, and "keeps a watchful eye and yet another species of watch," as he says. The secret he keeps us remember what we owed to the Dover Patrol. Truly, to borrow Cromwell's ringing words, they were a gallant company. The men of the Dover Patrol kept the Postern Gate by night and day, in temper, in damp and in cold. It may be technically exact to say that they were a match with the enemy, but if they did it was only half strait of the sea and weather such as no human power could control. May the spirit that inspired them remain with us as long as the granite of the fortifications stands.

Those of us who have seen those of their French comrades! The Earl of Moultrie O'Neil, the exact fellow of the English, is on the opposite side of the Channel. In New York, the Duke of Connaught, who has had his headquarters moved to New York, has dedicated a plaque to the Dover Patrol in memory of Americans who took part in that great and noble adventure.

The salt waters that flow between divide only to join those who have a common heritage in the greatest of the Dover Patrol.—London Spectator.

Old Scales

Old Hostelry in London Where Many Famous Men Were Weighed.

Writing of the "sign of the Coffee Mill" in St. James's Street, Mr. George H. Ham says that the London "sophires" that for centuries had that ancient establishment, now devoted solely to dispensing "those generous juleps which America has latterly rejected" have possessed a series of scales on which "the most eminent in human form sat to be weighed." Since the year 1765 accurate records of "illustrious and often regal ponderosity" have been kept, and last year the scales, as recorded in 1814, weighed 129 pounds; "Lord Byron in 1806 weighed 194 pounds, but by 1813 had 'reduced' to 173"; Beau Brummell weighed 172 pounds, while his Regent weighed 224 pounds. The heaviest ever weighed on the Coffee Mill's scales was Mr. George Drummond, who in 1850 registered 362 pounds.

Mr. Chesterton, Mr. Lucas remarks the original quota cited above, is the only present-day colossus worthy of association with the "havies" of the Coffee Mill's scales, and even the great essayist discredits the story of Mr. Chesterton's gallantry in standing in an omnibus to offer his seat to three ladies.

He adds: "I have tried to prove that an interest in amplitude and pugnacity obtains, I saw a Scotch paper the other day in which the proprietor of a wax-works exhibition advertised a champion weightlifter weight over 200 pounds (280 pounds). Wages £1 a day"—The Outlook.

Holes Popped With Dynamite.

Such flesh has been manifested at Ostend by reason of the impudence with which German officers who made themselves obnoxious to the townspeople during the occupation have turned up again to the pleasure of this town. There have been many unpleasant scenes, one rather arrogant German coming in for such unwelcome attention that he was requested by the authorities to leave the town within three hours.

Horses are gradually disappearing from the streets of Winnipeg, City Hall records show. The number in use now is 3,804, an against 4,758 in 1916.

A town cannot grow without business. By helping your local dealer you assist the community.

Until the year 1874 the Japanese used to vaccinate on the tip of the nose.

Futility Of Physical Forces To Secure The Peace Of The World

For Arctic Discovery

Amundsen Will Employ Two Air-planes and Take Wireless Equipment.

For the first time land machines

will be employed in the Arctic regions next year when Captain Roald Amundsen embarks upon his fourth expedition to reach the extremely polar point of the North. Captain Amundsen has announced that he will make an effort to realize his theory that by freezing into ice in the proper currents he may drift into the vicinity of the Pole in his ship, the "Maud." His chief difficulty in attempting to reach the Pole had been frustrated, through broken propellers. The world was taught, as never before in all its history, the futility of material force in securing peace and prosperity says the Presbyterian Witness.

It is significant that a growing number of the world's statesmen and leaders are becoming impressed

with this truth and are taking the rôle of prophets and preachers of a new evangel.

Among the most recent are addresses by Vice-President Coolidge, Senator Smith recently before the Supreme Council in England, General Smuts

said:

"I ask myself what will be the character of that history—will it be along the old lines, will it be the old spirit of competition, of strife, of contention which has been the bane of Europe, or shall we have purged our souls in the first struggle which we have passed? Will it be a new era of international co-operation, of friendly co-ordination of all the vast interests at stake? Shall we act in continuous friendly consultation, in the true spirit of a co-operative League? And will there once more be a reversion to old rivalries, to exclusive alliances, and finally of a terrible catastrophe more fatal than the one we have passed through? That, to my mind, is the alternative. We shall be compelled to take the ways at which we have arrived."

Referring to the Peace Treaty, General Smuts said:

"There is one chapter in that treaty which, to my mind, should be specially referred to the British Empire. That is the section dealing with the League of Nations. The Covenant may be faulty, but it may need amendment in order to make it more workable and generally acceptable. In the meantime, let us forget the Covenant and endeavor to make the Covenant embodies the most deeply held longings of the human race for a better life. There more than anywhere else do we find serious efforts made to transact the business of the world according to the greatest ideals, the greatest ideals for which we die."

"The League attempts to apply to the world the principles of the League of Nations. The Covenant may be faulty, but it may need amendment in order to make it more workable and generally acceptable. In the meantime, let us forget the Covenant and endeavor to make the Covenant embodies the most deeply held longings of the human race for a better life. There more than anywhere else do we find serious efforts made to transact the business of the world according to the greatest ideals, the greatest ideals for which we die."

Oh, Money! Money!

—BY—

ELEANOR H. PORTER

Printed by Special Arrangements with Thos. Allen, Toronto, Ont.

(Continued)

To Mr. Smith it was a small sum, but to Mrs. Jane Blaiddell it seemed him cordially or not. He even indulged now and then in a bout of chuckling, interlarded with results showed that he had matched his money against the value of the counter-trap to get what he wanted.

For the most part, however, Mr. Smith kept his traps closed, held him at his legitimate task of studying and copying the Blaiddell family history, and, in time, became a great number. Miss Maggie was pleased. She had done no more than she could to help him, and she liked him to come whenever he liked. She arranged the house, the big bony and fat old man to make himself quite at home, and she showed plain courtesy to the wife of one of the members of the family that Mr. Smith might be pardoned for such conning.

It was while at work in this corner that he came to learn so much of Miss Maggie's daily life, and of her visitors. Although many of these visitors belonged to some of those he knew. One day it was Mrs. Hattie Blaiddell, who was as bold and as bold as bird that would. She was breathless and excited, and her eyes were wide with wonder and admiration, she said. She wanted Miss Maggie's silver spoons, and her forks, and knives, and plates, and bowls, and creamer, and Mother Blaiddell's cut glass dishes.

Mr. Smith, supposing that Miss Maggie herself was to be at the luncheon, was just rejoicing within himself over his good fortune, and ant little outing, when he heard Mrs. Blaiddell telling her to be sure to bring the old man to the luncheon, and asking where could she get a maid to serve in the dining-room, and when she had said, "I'll bring him. He'd have to be sure to inspect everything," he had to say, "I'm not sure he'll answer to his name." Miss Maggie's answer to this, for her husband, was, "I'll bring him at once, and you can go up the stairs."

But, indirectly, he observed a very different face, and her eyes were wide with admiration, she said. Miss Maggie gone one day when he came and Brandy, who was in her place, had a large cake, and a tray of dandy frosted cake. Miss Maggie had made for the company to taste.

One day it was Mrs. Jane Blaiddell who came. Mrs. Jane had a tired frown between her brows and a weary smile, and she carried a large bundle which she dropped unconsciously into Miss Maggie's lap.

"There, I'm dead beat out, and I've brought it to you. You're just going to sit up and find me, and make me go to bed." And Miss Maggie's feet already lay on the floor.

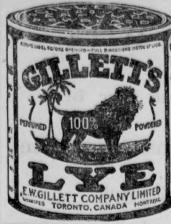

"What, of course, if I am? But what is it?" Miss Maggie's feet were already under the chair. "It's my old black silk. I'm making."

"Again?" But I thought the last time it couldn't ever be done again. "I've never seen anything like it, or of good in it yet," interposed Mrs. Jane Blaiddell, and I've bought new velvet, and a new dress, and a new lining. I thought I could do it alone, but I've found a point where I must have help. So I came right over."

"Yes, of course, but why didn't Miss Maggie tell you? She didn't tell you, did she?"

"Well, I know, but she didn't tell you, did she?"

"She didn't tell you, did she?"

World Happenings Briefly Told

Lake Huron has the curious record of having more islands than any other lake.

The censor refuses to permit the cabling of extracts of articles printed in Madrid newspapers. The telephoning of news also is forbidden.

The death of Lieutenant-Governor Lionel L. Clarke at Toronto creates the second lieutenant-governorship in Canada.

Nominal Schools of Manitoba will provide six hundred teachers for the province at sessions to be held this fall. Four hundred, if it is expected, will be given permanent certificates, and 200 will be given temporary licenses.

The all-Russian relief committee, formed recently with Maxine Gorky representing various parties as members, has been dissolved, and the members will no go abroad in the interests of Russian famine relief, as had been anticipated.

A farmer in touch with the dairy industry in the north expressed the opinion that the farmers of that section would not winter more than fifty per cent. of their present herds. He based his prediction on the shortage of hay.

Following a meeting of the German cabinet, Premier Elwert issued a decree prohibiting meetings, processions, demonstrations and the publication of periodicals and pamphlets likely to encourage sedition movements.

Concerns who deal in sports money before becoming inmates of Sing Sing prison have been told to ply their trade behind prison walls, it was learned when it developed that cheques totalling \$14,000 had been forged by prisoners assigned to office duty.

Operators in the alleged \$60,000,000 "swindle trust" arrested in Chicago have no connection with the Great West Bank of Canada, Winnipeg and Regina. It was stated here by Arthur Banbury, director of the General Bond Corporation, which is pronouncing the bank.

Fifal Agreement has been reached between the Manitoba and Ontario Provincial Governments for the construction of a trans-Canada transcontinental highway. The road will enter Manitoba at a point between West Hawk and Falcon Lakes at or near Mile Post 24, on what is called the south route.

Do you discriminate at the dining table—or are you thoughtless?

In thousands of homes, the "line" is drawn at the breakfast table. Tea or coffee is served for grown-ups—and Postum for children. But some parents do not discriminate. Tannin and caffeine, the injurious contents of tea and coffee, seriously retard the development of the delicate nerve tissue in children.

Consequently, instead of tea, satisfying Postum, which is not only good for the system, but is helped along by the drugs in tea and coffee; and so may grow up irritable and nervous. Any doctor can tell you that this is a great evil and should be corrected.

Although some parents feel a certain justification for the personal indulgence in tea or coffee, yet the harm to them may take a little while longer for the drugs in tea and coffee to affect

A Detector Of Carelessness

Machine Registers Bumps and Knocks Given to Freight In Transit.

Rough handling of freight in railway yards or in transit gives rise to many claims for damages. In districts this cause is reckoned as producing from 25 to 30 per cent. of all claims for damages. Railroad managers have wrestled with the problem, but it is difficult because it is so hard to trace the carelessness to any one train crew.

Now, however, an instrument has been devised to detect the time and place of damage done to moving freight, and when it has been made a success, it will be the subject of exhaustive tests by the Chicago, Milwaukee and St. Paul Railroad. The machine is constructed on the principle that a box or case when placed in a box or will record the time of each shock and also the intensity. By this means the management is able to prove exactly when and where, for example, the cars were switching of freight cars was done.

Our morals may not be improving,

but our skill in inventing methods to expose bad morals certainly shows no signs of flagging.—The New York Times.

His Flesh Horribly Burnt

His Druggist sold him a cheap Acid corn remedy, instead of giving him old reliable "Putman's Corn Extract." The Standard removes of corns and warts. "Putman's" never fails, it is always 25¢ everywhere. Reuse a substitute.

Oldest Bell In Western World

Taken From Spanish Monastery Bears Date 803 A.D.

The oldest bell in North America or either of the Americas—is in the rector's of the small village of Estremoz, Portugal, which contains a few yards from the famous cathedral of Nathan Hale. The bell bears the date, "AD. 803," and it is believed it was taken from an ancient Spanish monastery. The bell probably came from a ship's bell or junk as junk. At any rate, this particular bell was purchased from a junk yards and presented to the church.

The age of the bell, however, is doubtful, as the name of the

monastery is unknown.

There is a legend that the bell is the oldest in this continent, and that it was cast to ring over the waters of the world from the first churches built on these shores.

The Friend of All Sufferers—Dr. Thomas' "Elixer Oil" is a valuable remedy to all those who suffer pain. It holds out hope to everyone and especially to those who are even worse. It is a balsam that has the blessing of half a continent. It is a simple syrup and can be found wherever apothecaries are located.

There is said to be a shooting fish with a hollow, cylindrical back. When it sees a fly on plants that grow in shallow streams it ejects a single drop of water, which knocks the fly into the tide.

The Last Link With Franklin

Reminiscences of Gallant Seaman Who Braved Arctic Perils.

The other day at Hull, there died at the great age of ninety-seven, a captain, Richard Tether, who was the spokesman in several active Arctic expeditions of Sir John Franklin's party, every searching expedition bringing reports of importance to geographical science. Tether's death is the occasion of looking backward to the search for a Northwest Passage, and especially to Sir John Franklin's last expedition and the expeditions for his relief, and later for the purpose of recovering what happened to the "Frobisher" and "Terror" and their gallant passengers.

Franklin is an arctic hero of a singularly heroic maritime age and his name is associated with Canada's most glorious naval history.

Franklin was a captain of a whaling vessel, he wintered in Cumberland Sound, and he taught the natives to hunt seals.

He was a member of the crew of the "Baffin" which was lost in the Arctic.

He was a member of the crew of the "Hercules" which was lost in the Arctic.

He was a member of the crew of the "Sir John Franklin" which was lost in the Arctic.

He was a member of the crew of the "Sir John Franklin" which was lost in the Arctic.

He was a member of the crew of the "Sir John Franklin" which was lost in the Arctic.

LOST 29 POUNDS DYSENTERY WAS THE CAUSE

Dysentery is one of the worst forms

of bowel complaint, and hardly any other disease so quickly undermines the body.

The disease is often protracted and inter-

mittent, often terminating fatality.

To check the disease without bringing

on constipation you must

use a strong cathartic.

Mr. G. H. McVagh, Maser, Sa-

ke, writes: "About eight days ago I had a severe attack of dysentery.

I stayed in bed three weeks.

I took a dose of Cetacean Ointment

for about a month and

then got it stopped.

I tried every

kind of cathartic, but

nothing would stop it.

It is a very bad disease.

BOW ISLAND REVIEW
ONLY \$2.00 A YEAR

Creston B. C. News

Mr. Frank Sutton formerly of Bow Island after spending several days in this vicinity returned to his home in Bow last Thursday.

The Presbyterian Sunday School celebrated Labor Day with a picnic at the river.

The fire that has been raging in the Goat River bottom near the Winlaw timber limit is under control at present.

Several more cars of fruit were shipped by the Union Fruit Growers last week and apple picking is the order of the day, there are still Plums, Italian Prunes and Pears to be shipped out yet.

Labor day was quiet here all places of business being closed, hunting and fishing was the order of the day, with a good dance at night.

The Cranbrook and Creston Ball teams met on the local diamond here, one game was played Saturday morning and one Saturday evening, the visitors gave our team such a wallop that they have not mentioned ball since.

School commenced here last Tuesday with six teachers in the staff, all the former teachers being retained.

Several tourists spent Sunday in our City, some out for pleasure while a few were looking for a location.

\$20 REWARD

A Reward of Twenty Dollars will be given for return of or information concerning the recovery of a Blue Serge Coat with Returned Veteran's Button fastened on it, no questions asked.

Burdett News

School opened last Thursday Sept. 1st, but with only two teachers, Mr. Little the principal, and Miss Bonnale, through some misunderstanding, the balance of the staff, Miss Lawson and Miss Dickinson, who have been spending their holidays on the coast, arrived only on Monday Sept. 5th.

The Trustees of the School feel that they have been very fortunate in securing such a splendid staff of teachers and are looking for a repetition of the splendid work of last term.

Messrs. Judge Lomas, A. Hamilton, R.H. Ostrum, E. Warry and J.F. Hamilton motored to Lethbridge last Monday afternoon returning the same evening.

The threshing of the wheat crop is not general, as most of it was headed and stacked, and cannot be threshed until it has been in the stack some two or three weeks, as it takes about that length of time to get through the swath.

The returns are going to be very small again, and it is hoped the creditors of the farmers will be very lenient as it is going to be impossible for them to pay in full, but if these who can pay, would do so, it would help those who are less fortunate.

We are sorry to report that Claude Brown is very sick with Pneumonia. Dr. McPhail is in attendance, it is hoped that he will soon recover.

The Burdett L. D. S. Church, Primary children, spent a very enjoyable day at the river Labor Day.

Miss Alice Pool left Monday Sept. 5th, for Calgary where she expects to attend High School.

Judge Lomas reports a very quiet week in Court Circles.

BORN—to Mr. and Mrs. Claude Brown on Thursday Sept. 1st, a ten pound daughter. Dr. McPhail attended.

Mr. William White was a business visitor to town last Tuesday.

Miss Bernice and her friend came down home last Saturday and returned last Monday.

Mr. C. Malcolm Roberts is now Principal of Joann's School, this gentleman comes highly recommended having had ten years teaching experience in Ontario and lately of Edmonton.

A Good Cow to Exchange

One Killed When Freight Train and Speeder Crash

COLEMAN, Sept. 6.—A collision between a truck motor and a C.P.R. freight train took place at the rock cut west of Coleman, at 7:25 Saturday night, caused the death of J. Matuk and slightly injured J. Patroshuk, who was the speeder riding in the Bush Town, Coleman. The latter jumped off in time but the former was too late. The men evidently did not hear the whistle of the train as it was rounding the curve. As a result of the collision the engine of the freight was derailed and the passenger train due to arrive at Bow Island at 5 a.m. was delayed over eleven hours.

For This Week

We have a Full Line of:

Home Killed Prime Steer Beef

Grain Fed Pork

Milk Fed Veal

BURDETT MEAT MARKET
GEORGE LOMAS, PROPRIETOR

BURDETT

It is reported that N.F. Edlund has sold his farm to a man from California for 70 Dollars an acre, this price is paid for implements, houses and buildings.

It is said that Mr. Edlund intends to make his future home in California.

A party of business men from Burdett spent Labor Day in their praises of the very pleasant time they all had.

W.H. Perry was a visitor to Lethbridge last Wednesday.

It will be a lucky man that gets the \$20 for finding that Blue Serge Coat with the Return of Soldiers Button on it. They can get it by applying to the Review Office at Bow Island
